## ADVICE TO HEALTHCARE PROFESSIONALS

### **Immune-related side effects:**

- Thyroid dysfunction
- Skin rashes
- Pneumonitis
- Diarrhea and colitis
- Hepatotoxicities
- Renal toxicities
- Adrenal insufficiency
- Hypophysitis
- Other autoimmune disorders

### **Required blood tests:**

- CBC and CMP
- Random cortisol/ACTH
- Thyroid function test

If patient has dyspnea, order chest CT.

*Steroids may be given to manage immune-related side effects. Please reach out to the patient's oncologist for help with management.*
