

Firearm Suicide Prevention

For gun owners, protecting your family involves more than keeping them safe from accident or attack. It also involves being aware of the warning signs of suicide and the steps to prevent it. This can be accomplished without government mandates. Together we can protect our family, our friends, and our freedom.

Putting time & distance between a suicidal person and a gun may save a life.

- **Guns are the most deadly method of suicide.**
- **Suicidal crises are often brief.**
- **90% of those who survive a suicide attempt will not go on to die by suicide.**

Access Prevention: Is your safety on?

Lock

Store guns safely and securely when not in use. Change your gun locks if necessary, and make sure the keys and combination aren't accessible

Limit

Lock guns and ammo separately, or don't keep ammunition in the home at all. Ask to temporarily keep the keys to any gun of a friend who is struggling

Remove

Temporarily store firearms off site until the situation improves, perhaps at a friend or relative's house. Gun shops and law enforcement may offer storage options.

What if it's YOU at risk?

Any strategy that builds some time between you and a gun in a suicidal crisis will keep you safer. Temporarily store your guns off site, disassemble them, or lock up at least one component. Ask a friend to hold your keys, or store the keys somewhere they're not available in a crisis like a bank safe deposit box.
