Help! Checklist

Some steps you can take to help the flight crew minimize ground time and expedite your patient transfer.

-▶ Maintain spinal precautions on ALL traumas!
-▶ If possible, place two (2) IVs
 - Mark IV bags with medication / concentration / drip rate
 - Pre-order an extra IV bag from the pharmacy if meds are running at a fast rate

-▶ Empty Foley bag
-▶ Place patient belongings in a MARKED bag
-▶ Call receiving RN/Unit and give report
-▶ Help flight crew prepare and move your patient

Make copies of:

- Patient chart / x-rays / CT scans / MRI
- Recent EKG strips / labs or test results
- Recent ABGs on current oxygen status
- Maternal history / information for neonatal patients
- Two copies of the Demographics sheet

Life Flight will transport to any appropriate facility of your choice
