

# WHEN TO THROW AWAY A USED N95 RESPIRATOR

07/14/20

## STAY SAFE.

If your N95 looks like this, your seal may not be working:

Visibly soiled

Doesn't retain shape

Damaged (stretched-out or broken strap, nose clip)

## Throw it away!

Get a new N95 — the make and model that you have been fit tested to wear.

Do a seal check every time you use your N95.
