

PPE Information and Ordering

March 11, 2020

Ordering information is listed for the acceptable PPE ensemble options necessary to protect caregivers caring for COVID-19 Variable Risk (Contact/Droplet with eye protection) and COVID-19 High Risk (Contact/Droplet/Airborne) patients. Please note that the current CDC eye protection recommendation for High Risk COVID-19 patients specifies a FACE SHIELD or GOGGLES, which are more protective than SAFETY GLASSES. See current COVID-19 PPE Tool Kit Donning/Doffing procedures for specific disinfection and reuse instructions for eye protection.
