

Pacemaker Clinic

What to expect during your clinic visit:

Typically every six months you will be offered a pacemaker/ICD clinic appointment.

During your Pacemaker Clinic visit your device will be interrogated and tested to ensure optimal programming. This is important because adjustments can be made that may prolong the life of your device. During testing a paced and unpaced rhythm strip will be obtained, unless you are pacemaker dependent.

The device testing is approximately 30 minutes, but you will spend approximately one hour for the complete test and visit with your physician.

Please write down in advance any questions related to your pacemaker that you would like to have addressed by the technician and/or physician.

Where to check in:

Check in at the Cardiology Clinic, located on Level 2, Station 2 in the Primary Children's Outpatient building.

Arrive early:

Please arrive at least 15 minutes early for your pacemaker check to allow for parking and paper work.
