

What is amicus?

AMICUS, derived from the Latin word for 'friend,' is the Annual Giving Society for Intermountain Research and Medical Foundation (IRMF). IRMF is part of the Intermountain Foundation, which oversees local and regional fundraising programs within Intermountain Healthcare.

AMICUS is devoted to supporting medical research and hospital initiatives throughout Intermountain Healthcare's Salt Lake Valley hospitals — Alta View Hospital, LDS Hospital, Intermountain Medical Center, Riverton Hospital, and TOSH -The Orthopedic Specialty Hospital. Fundraising initiatives include education, equipment, charity care, and facility improvements.

AMICUS supports the mission of Intermountain Research and Medical Foundation by:

- Providing "Friend-Making" and "Fund-Raising" opportunities.
- Identifying and involving community leaders as advocates in the support of medical research and education.
- Communicating the role of the hospitals of Intermountain Healthcare's Central Region as preeminent health care resources for the community.
