Preparing the syringe

1 | Remove the syringe cap.

2 | Push the plunger to remove any air from the syringe.

3 | Replace the syringe cap until you are ready to use it.

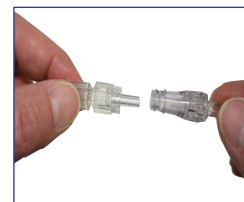

Delivering the medication

1 **Remove** the alcohol cap from your IV line and attach a normal saline syringe. Open the clamp and flush the line.

2 **Attach** the medication syringe and inject the medication. Check the label for the rate that the medication can be pushed.

3 **Disconnect** the syringe and flush the IV line.
