- 1 Pull back on the plunger to fill the syringe with the same amount of air as your medication dose.**

- 2 Push the syringe into the vial.**

- 3 Turn the vial and syringe upside down. Push the air into the vial and then pull back on the plunger to fill the syringe with ____ milliliters (mL) of medication.**

- 4 Remove the syringe from the vial. Tap the syringe so any air bubbles float toward the needle. Push the plunger to remove the air bubbles. Make sure you still have the correct amount of medication in the syringe.**
- 5 Carefully put the cap back on the needle until you are ready to use it.**
