Form Completed By   Position

In the boxes under the heading TARGET BEHAVIORS, write in the behaviors(s) that are being observed. In the boxes appearing under the heading TIME, write the time intervals during which the behaviors will be tracked. For each occurrence of the target behavior during a time interval, circle a number in the corresponding box. This will provide a baseline frequency for that behavior. Then calculate a mean frequency rate for each target behavior.

TIME	TARGET BEHAVIOR #1	TARGET BEHAVIOR #2	TARGET BEHAVIOR #3
	1 2 3 4 5 6 7 8 9 10	1 2 3 4 5 6 7 8 9 10	1 2 3 4 5 6 7 8 9 10
