

# **Nutrition During Cancer Treatment**

When you're fighting cancer, good nutrition is an important part of your treatment. Eating the right kinds of foods before, during, and after treatment can help you tolerate your treatment better and give you more strength for recovery and healing.

#### **Before cancer treatment**

Even if your treatment has not yet begun, start eating a diet with **plenty of calories and protein** right away. Good nutrition and the guidelines in this fact sheet will help you:

- · Build extra strength for healing
- Prevent body tissue from breaking down
- · Fight off infection
- Cope with higher doses of cancer treatment

#### **During cancer treatment**

Many cancer treatments that are designed to kill cancer cells also damage healthy cells — which can affect your weight and appetite. Treatments can also affect your body's ability to fight illness. This is called immunosuppression [im-yuh-noh-suh-PRESH-uhn].

Studies show that people who eat well during cancer treatment better tolerate side effects and fight illness. Get the best nutrition and fight infection by:

- Following special food-handling guidelines—see page 2. Because your ability to fight infections is weaker than usual, you must be extra careful about germs. Learn safe ways to store and prepare food to prevent exposure to germs. Make sure to share the guidelines on page 2 with anyone who prepares or brings you food.
- Choosing foods wisely—see page 3. Eat plenty
  of calories and protein, and use the table on page 3
  to choose foods that are safe and free from harmful
  germs. Avoid the specific foods listed in the table
  during cancer treatment.

- Managing side effects—see page 4. You may have side effects that make you not want to eat. Learn what to eat when you don't feel well.
- Staying in touch with a registered dietitian nutritionist (RDN)—see below. An RDN can answer questions and provide suggestions for specific eating problems.

#### After cancer treatment

Return to traditional guidelines for healthy eating. Eat a variety of foods, and go easy on saturated animal fat, salt, sugar, and alcohol. But, continue to follow the food-handling guidelines (on page 2) for 2 to 3 months. A safe, healthy diet will help you regain your strength, rebuild tissue, and feel better.

## Following safe food-handling guidelines

Because cancer treatments weaken your immune system, follow these DOs and DON'Ts to keep germs from making you sick.

When you:	DO	DON'T	
Eat away from home (in the hospital or at a restaurant)	<ul> <li>Unless your providers say not to, you may have commercially packaged snack foods and drinks.</li> <li>Choose restaurants you know are clean. Ask for single-serving condiments.</li> </ul>	<ul> <li>Eat fast food, other restaurant food, or self-prescribed nutritional supplements.</li> <li>Avoid salad bars, delicatessens, smorgasbords, buffets, pot lucks, and sidewalk vendors. Don't eat ice cream, yogurt, and milk shakes from soft-serve machines.</li> </ul>	
Shop for food	<ul> <li>☐ Get cold foods home and into the freezer fast.</li> <li>☐ Make sure cans are not dented and containers don't have cracked lids.</li> </ul>	that is spoiled.  □ Eat delicatessen foods.  □ Leave these foods at room temperature longer than 2 hours: milk and dairy products, eggs (unless they're pasteurized), all types of meat and fish, haked notatoes tofu and other soy proteins.	
Prepare food at home	<ul> <li>□ Keep foods at a safe temperature by:         <ul> <li>Cooking hot food thoroughly, and then keeping it warm at or above 135° F.</li> <li>Refrigerating food immediately if you are not going to eat it right away.</li> <li>Keeping cold foods below 41° F.</li> <li>□ Wash tops of cans before opening.</li> </ul> </li> </ul>		
Store food	<ul> <li>□ Use tightly sealed, covered containers.</li> <li>□ Discard foods that have passed their expiration date.</li> <li>□ Divide food purchased in large economy sizes into serving sizes and seal in new food-storage bags.</li> <li>□ Rotate stored food to use the oldest food first.</li> <li>□ Keep your non-refrigerated food storage area between 50° F and 70° F.</li> <li>□ Keep your refrigerator between 34° and 40° F.</li> <li>□ Refrigerate only as much food as can be eaten in 2–3 days, and freeze the rest.</li> <li>□ Keep your freezer colder than 5° F.</li> <li>□ Store foods in freezer bags or in clear airtight containers.</li> </ul>	<ul> <li>□ Keep refrigerated leftovers after 3 days or frozen food with freezer burn.</li> <li>□ Keep food that has been frozen longer than the time limit shown below.</li> <li>Storage time limits for frozen foods         <ul> <li>Bakery goods and breads</li> <li>2 months</li> </ul> </li> <li>Prepared foods containing meat broths or gravies</li> <li>Prepared meat dishes</li> <li>3-4 months</li> <li>Uncooked pork</li> <li>4-6 months</li> <li>Other meats, uncooked</li> <li>6-12 months</li> <li>Vegetables</li> <li>6-9 months</li> </ul>	
Clean up	<ul> <li>□ Keep your food preparation areas clean by:</li> <li>− Frequently using a sanitizing solution (1 tablespoon bleach to 1 gallon water) on counter tops, cutting boards, eating surfaces, dishcloths and towels, can openers, and food processor blades.</li> <li>− Removing food particles and spills from all surfaces, appliances, and storage areas.</li> <li>□ Wash dishes on the hottest dishwasher cycle.</li> </ul>	<ul> <li>☐ Handle food or prepare it without washing your hands with soap first.</li> <li>☐ Use anything other than clean paper towels to dry your hands.</li> <li>☐ Hand wash dishes without using a sanitizing solution afterwards (1 tablespoon bleach to 1 gallon water).</li> <li>☐ Use towels to dry dishes (let them air dry).</li> </ul>	

## Making Safe Food choices (especially avoid items in bold)

Groups	Allowed	Not allowed
Milk and dairy products	<ul> <li>Pasteurized grade A milk and milk products, yogurt, sour cream, butter, margarine, whipped topping.</li> <li>Commercially packaged cheeses: mild and medium cheddar, mozzarella, Swiss, Parmesan, cottage cheese, cream cheese.</li> </ul>	Unpasteurized or raw milk or milk products.     Cheese: from delicatessens, with chili peppers or vegetables mixed in, with mold, bleu, Stilton, Gorgonzola, Brie, feta, farmers, Camembert, sharp cheddar.
Meats or substitutes	<ul> <li>All well-cooked or canned meats, fish, poultry, shellfish, smoked meats, commercially packaged lunch meat, canned or commercially packaged fish (refrigerate after opening).</li> <li>Eggs cooked until whites congeal and yolks begin to thicken.</li> <li>All cooked entrees, beans, peas, and lentils.</li> </ul>	<ul> <li>Raw or under cooked meat, fish, poultry, sushi, sashimi, steak tartare.</li> <li>Meat and cold cuts from delicatessens.</li> <li>Cold smoked fish, pickled fish.</li> <li>Raw or under-cooked eggs.</li> <li>Undercooked tofu.</li> <li>Miso products.</li> </ul>
Vegetables	<ul> <li>Raw vegetables washed under cold running water before cutting and peeling.</li> <li>All cooked frozen or canned vegetables.</li> <li>Canned or pasteurized vegetable juice.</li> </ul>	<ul> <li>All types of sprouts.</li> <li>Pre-cut or pre-washed vegetables purchased in vacuum packs or bags.</li> <li>Moldy vegetables.</li> <li>Unwashed raw vegetables or raw vegetables difficult to clean, such as mushrooms, spinach, and parsley.</li> <li>Salads from delicatessens.</li> <li>Commercial salsa from the refrigerator case.</li> </ul>
Fruit	<ul> <li>Raw fruit washed under cold running water before cutting or peeling.</li> <li>Canned or frozen fruit.</li> <li>Canned or fresh pasteurized fruit juice.</li> </ul>	<ul> <li>Home-canned products.</li> <li>Moldy fruit.</li> <li>Unwashed raw fruit or hard-to-clean fresh fruit, such as berries (like raspberries), grapes in bunches (can wash individually), pineapple.</li> <li>Unpasteurized fruit juice.</li> </ul>
Breads, cereals	<ul><li>All bread products.</li><li>All cereals, pasta, rice, potatoes, etc.</li><li>All chips, pretzels, and popcorn.</li></ul>	<ul> <li>Raw grain products.</li> <li>Moldy bread: if even one piece is moldy, throw out the entire package.</li> </ul>
Fats and nuts	<ul> <li>All oil, shortening, butter, margarine, creams, gravy.</li> <li>Commercial shelf-stable dressings, mayo, sauces.</li> <li>Roasted nuts in bottles or cans, nuts in bakery products, commercial peanut butter.</li> </ul>	<ul> <li>Fresh refrigerated salad dressings containing aged cheese or raw eggs.</li> <li>Unroasted raw nuts.</li> <li>Unprocessed nuts in shells.</li> </ul>
Soups, stews	<ul><li> All cooked soups except miso soup.</li><li> All cooked entrees, casseroles, stews, etc.</li></ul>	Miso soup.
Desserts	<ul> <li>Cakes, pies, cookies.</li> <li>Refrigerated cream-filled pastries, puddings.</li> <li>Frozen ice pops, ices, sherbet, gelatin.</li> <li>Commercial ice cream and frozen yogurt, ice cream filled products.</li> </ul>	<ul> <li>Unrefrigerated cream-filled pastries.</li> <li>Soft-serve ice cream, frozen yogurt, and milk shakes.</li> </ul>
Beverages	<ul> <li>Tap water from city or country sources, bottled water, bottled or powdered beverages.</li> <li>Instant or brewed coffee or tea, cold brewed tea made with boiling water, herbal tea.</li> </ul>	<ul> <li>Well water, unless tested yearly and found safe.</li> <li>Cold brewed tea made with cold or warm water.</li> </ul>
Nutrition supplements	Commercial liquid or powdered nutrition supplements, such as Ensure, Boost, Resource, Carnation Instant Breakfast, etc.	Dried herbs, including herbal nutrition supplements and Chinese herbs.
Other	<ul> <li>Spices: salt and pepper, spices less than 6 months old, all herbs and spices if added during cooking.</li> <li>Sugar, brown sugar, jam, jelly syrup, candy, and gum.</li> <li>Bottled condiments: catsup, mustard, barbecue and soy sauce.</li> <li>Commercially packaged honey.</li> </ul>	Raw or unpasteurized honey.     Uncooked, fresh or dried herbs and spices, including herbal nutritional supplements.

### **Managing common side effects**

Try the ideas below to help you find something you can eat when your dealing with treatment side effects.

	under control.
Loss of appetite	☐ Start with small amou
$\square$ Eat the foods you like the most.	other foods slowly to
☐ Eat 6 small meals throughout the day, including a snack at bedtime, rather than 3 larger meals.	Nausea
<ul> <li>□ "Power pack" your food by adding butter, cheese, or other high-calorie ingredients.</li> <li>□ Drink high-calorie, high-protein supplements such as Carnation Instant Breakfast or Ensure.</li> <li>□ Eat soft, cool, or frozen foods.</li> <li>□ Eat as much as you can when you're feeling well.</li> <li>□ Ask your doctor about appetite stimulants.</li> </ul>	<ul> <li>□ Eat foods that are ear (crackers, toast, yogus fatty, very sweet, spin last slowly.</li> <li>□ Eat slowly.</li> <li>□ Eat 6 small meals a deal last last last last last last last la</li></ul>
Changes in taste and smell	☐ Ask your doctor abou
<ul> <li>□ Avoid foods with strong odors.</li> <li>□ Add seasonings, flavorings, or sauces.</li> <li>□ Eat foods cold or at room temperature.</li> <li>□ Use plastic utensils and dishes.</li> <li>□ Add sugar if food tastes too salty. Add salt if food tastes too sweet.</li> </ul>	Diarrhea and cram  ☐ Drink plenty of fluids ☐ Use fewer dairy prod dietitian for more ide ☐ Eat foods that contai applesauce, oatmeal,
Dry mouth	that are peeled.
<ul> <li>□ Drink 8 to 12 cups of liquid daily.</li> <li>□ Add sauces, gravies, or salad dressings to foods.</li> <li>□ Stimulate your saliva with sweet or tart foods and drinks, or by sucking on hard candy or</li> </ul>	<ul><li>□ Eat foods high in pot bananas, juice, fresh potatoes, as tolerated</li><li>□ Avoid caffeinated dri</li></ul>
chewing gum. (Avoid if you have a sore mouth or	Weight loss and m
throat.)  □ Keep your lips moist with lip balm.	☐ "Power pack" your fo cheese, or other high
Sore mouth and throat	☐ Drink more liquids.
☐ Avoid foods or liquids that irritate your mouth.	☐ Eat more fiber.
☐ Drink through a straw.	Constipation
<ul> <li>□ Eat soft or pureed foods.</li> <li>□ Eat your food cold or at room temperature.</li> <li>□ Rinse your mouth often with water.</li> </ul>	<ul><li>□ Drink hot beverages.</li><li>□ Increase fluid intake.</li><li>□ Increase fiber intake.</li></ul>
