AFTER MEETING CRITERIA

Once it has been determined that you meet the criteria and a request for participation has been submitted, our eligibility counselor will call you within 2 business days to assist you with pre-registration and payment options.

- You may make payments to your account at any time during your pregnancy. However, the Stork Savers rates must be paid in full by 37 weeks.

Visit www.intermountainhealthcare.org/storksavers for more information.

STORK SAVERS

LABOR AND DELIVERY PRICING
STORK SAVERS PROGRAM

Intermountain Healthcare is proud to offer options that help un-insured families in our community access high quality maternity services at a low, fixed price. The Stork Savers Program was designed for our self-pay families who meet low-risk birthing criteria. It is currently available to families who deliver at any Intermountain hospital.

STORK SAVERS PRICING

- Uncomplicated Natural Delivery without Epidural
  - 24 hours Postpartum Stay
  - Mom and Baby — $4,050
    (Mom $2,900, Baby $1,150)

- Uncomplicated Natural Delivery with an Epidural
  - 24 hours Postpartum Stay
  - Mom and Baby — $4,500
    (Mom $3,350, Baby $1,150)

This is a self-pay, pre-pay program for hospital costs only and does not cover the professional fees charged by doctors or other providers for your care.

Because it’s important for you to know what to expect and feel prepared, an online prenatal class is also included in our Stork Saver program. Once registered, you will receive an email link with access instructions for this course in addition to a list of other education opportunities designed to help support you on your special day.

See www.intermountainhealthcare.org/storksavers.

QUALIFYING FOR STORK SAVERS

In order to qualify, you must:

- Establish prenatal care with an OB provider (Doctor or Certified Nurse Midwife) prior to delivery
- Be a low-risk pregnancy (e.g. you are having a single baby, no previous uterine surgery, reach 37 weeks, or greater, before labor)
- Plan on a 24-hour postpartum stay
- Have all newborn screening tests completed before discharge
- Set up an appointment, and meet with your pediatrician within 48 hours of discharge.

Complications that arise prior to or during labor and delivery may make you ineligible for the Stork Savers program. Should this happen, all payments already made will be deducted from your final bill, and our eligibility counselor will work with you to determine the best alternate payment option for you, such as a 40% discount option, or application for financial assistance programs.

If you are interested in participating, please call 833-833-0560 or send an email to: storksavers@imail.org with your name and phone number, and Stork Saver Liaison will call you directly.

STORK SAVERS DOES NOT INCLUDE

- Provider (Doctor, Nurse Midwife, etc.) fees: Providers bill separately from the hospital. Talk to your provider about prenatal care options.
- Antepartum care prior to being admitted and giving birth (i.e ultrasound procedures, pre-term procedures, triage and/or hospitalization).
- Postpartum care after discharge.
- Provider charges for epidural anesthesia: An additional charge will be billed separately by the anesthesiologist. If you need more information about epidural anesthesia, please talk to your primary care provider.
- Male infant circumcision (talk to your pediatrician for outpatient options).
- Additional procedures that are not part of a normal, vaginal birth — such as tubal ligation: You can still use Stork Savers for the delivery, but these additional procedures will be added to the package price.
