## Purpose

Advancement in the fields of Pediatric Cardiology, Congenital Cardiac Surgery, and Cardiac Critical Care is being influenced and driven by the Quality equation: Quality = Value/Cost. The development of shared baselines and a focus on decreasing variability is changing the way we care for our patients. Given the current velocity of growth in our field, it is vital that practitioners are exposed to different approaches and be given the tools to look at problems in new ways.

The purpose of this meeting is to provide a forum to foster an exchange of ideas and provide exposure to leaders in their respective disciplines in order to advance the field and learn new ways to improve the quality of the care we provide. We also hope to develop the careers of attendees through interactions with and mentorship from leaders and innovators in the field.

This meeting targets physicians, advanced care practitioners, and nurses who are involved in the care of pediatric and adult patients with congenital heart disease. This includes: Pediatric Cardiologists, Pediatric and Congenital Cardiac Surgeons, Pediatric Intensivists, Advanced Practitioners (nurse practitioners and physicians assistants), Pediatric Cardiology Fellows and Pediatric Cardiac and Cardiac intensive care nurses.

## Conference Format

This three-day conference will contain several distinct session types: Round Table Discussion, Didactic Sessions, Case-Based Tutorials and Abstract Presentations. This format will engage the physician learner and enable them to interact on multiple levels.

## Keynote Speaker

Brent James, MD

Dr. Brent James is the Executive Director of the Institute for Health Care Delivery Research and Vice President – Medical Research and Continuing Medical Education. For more than 20 years, he has championed the standardization of clinical care through data collection and analysis on a wide variety of treatment protocols and complex care processes. Dr. James has devoted himself

to using quality improvement tools to better understand the cause and effect relationship between various practice and environmental factors. Today, nearly 100 years after his mentors' ground-breaking discoveries, Dr. James firmly believes that the practice of medicine and delivery of health care stands at another critical crossroad.

## Abstracts

Abstracts are due March 4, 2016.

Registration costs will be waived for accepted abstract presenters. Email completed abstracts to: [pc-pes@imail.org](mailto:pc-pes@imail.org)

## Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint providership of Primary Children's Hospital, the Department of Pediatrics at the University of Utah School Of Medicine, and the Western Society of Pediatric Cardiology. Primary Children's Hospital is accredited by the ACCME to provide continuing medical education for physicians.

## AMA Credit

Primary Children's Hospital designates this live activity for a maximum of 15.25 *AMA PRA Category 1 Credits*<sup>™</sup>.

Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## Purpose

The purpose of this conference is to increase the knowledge and skills of sonographers and physicians who screen mothers for possible fetal heart disease. The first day will focus on basic and in-depth fetal heart imaging, the usefulness of early screening and managing affected pregnancies. The second day will focus on fetal cardiac embryology, fetal imaging of specific

outflow tract abnormalities such as truncus arteriosus and transposition of the great arteries as well the impact of screening from the perspective of parents of children with heart defects. These sessions will increase the expertise of participants on imaging these anomalies, understanding how they develop and the impact of prenatal screening on families.
