

PROCEDURE DOLL AND GOWN

This doll will be sent to hospitals for children who are undergoing surgery. Children will draw a face on the doll and mark where their surgery will be. Doll can be made out of sheet type fabric; preferably white, so the child can draw on the doll face.

DOLL

1. Cut out pattern piece B, (leaving black outline on pattern). Fold B on fold line, tape or glue B to bottom of A at placement line.
2. (It may be easier to cut pattern out before placing on fabric.) Place pattern on fold of fabric and cut out two, one for the front and one for the back.
3. With right sides together using a $\frac{1}{4}$ " inch seam, sew back and front together, leaving an opening as shown on pattern. Back stitch to secure seams.
4. Turn inside out and stuff with batting starting with head, legs, and arms. Stuff so doll is soft and squeezeable. Stuff body next.
5. Hand sew the opening securely, being careful to fold seams in the inside.

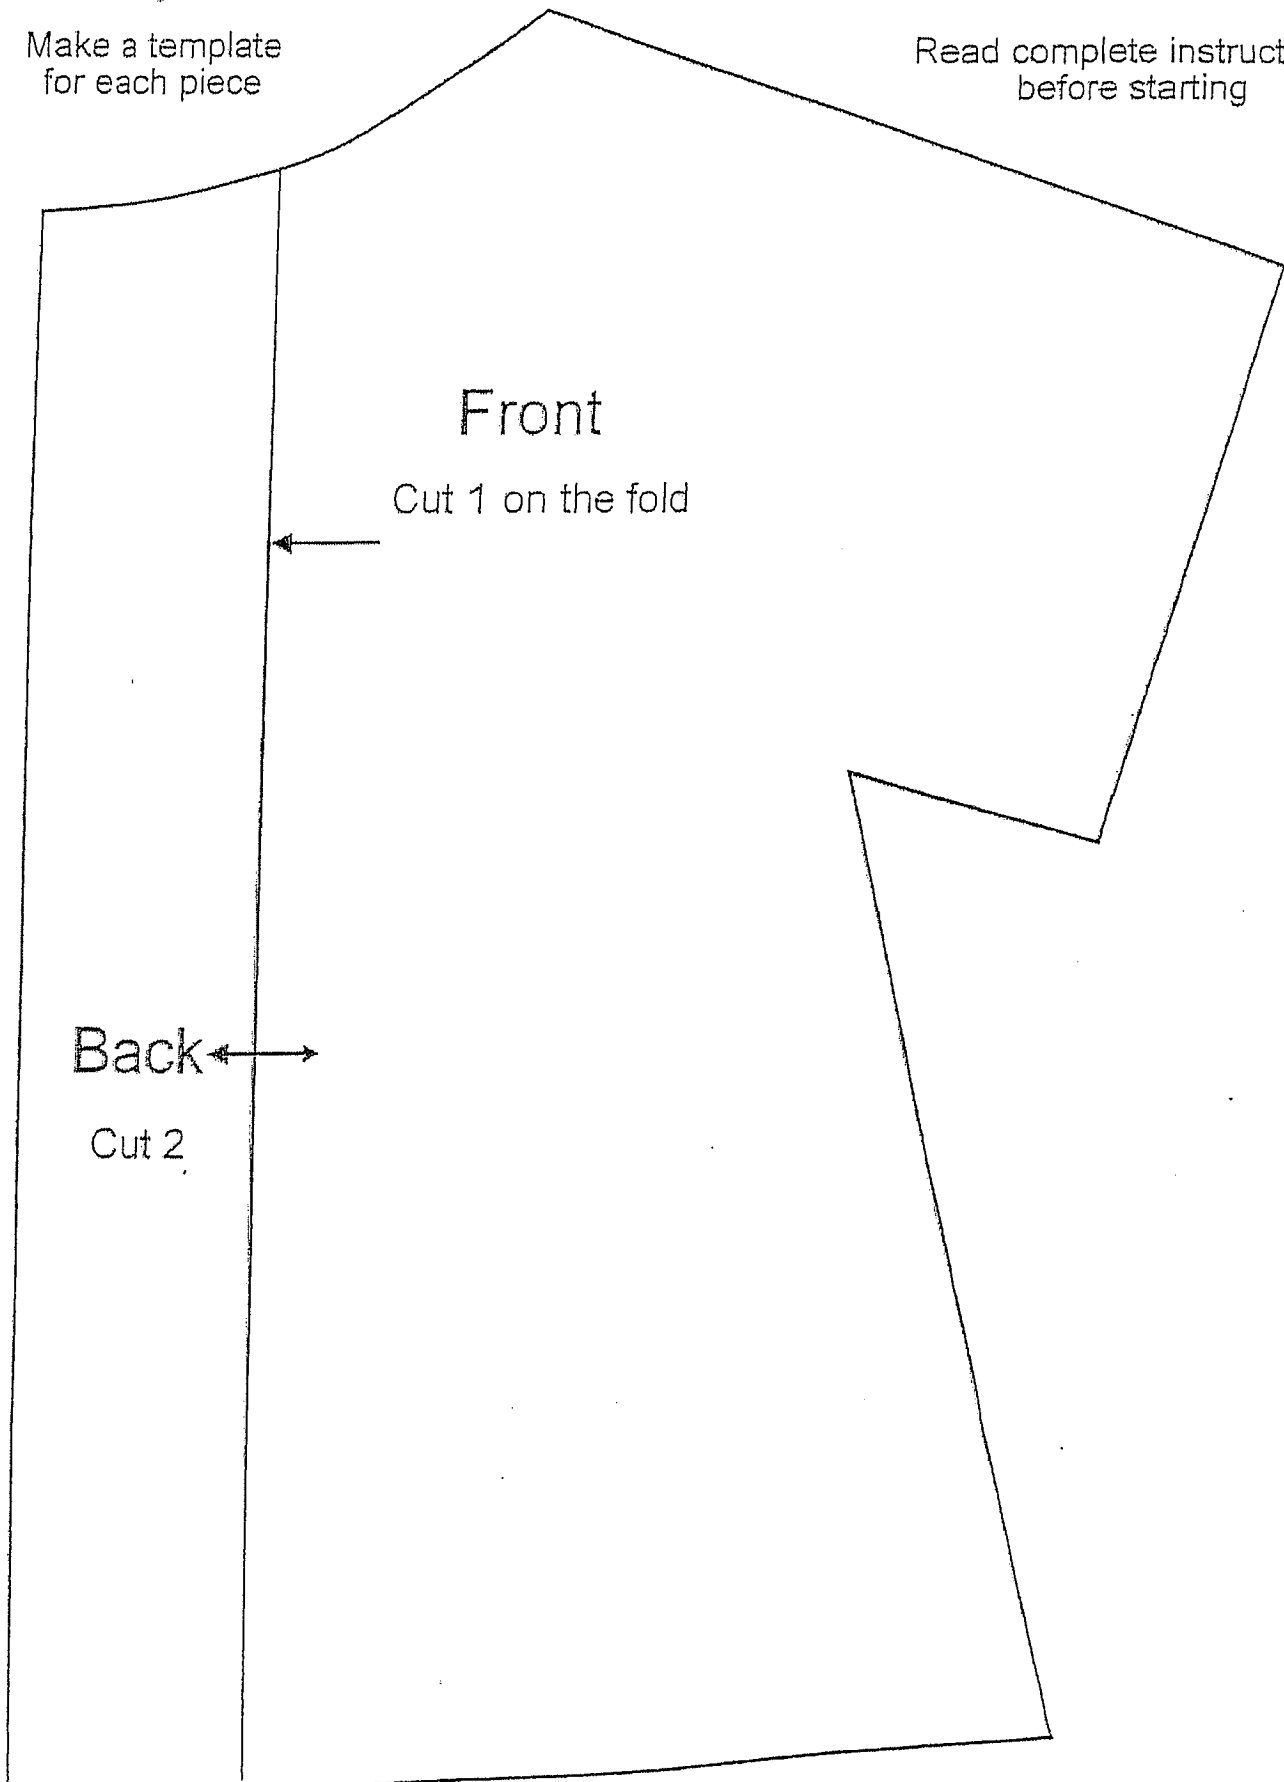

GOWN

1. Select fabric with a "happy print" (small flowers or striped design) for boys as well as girls.
2. Each gown needs a piece of fabric measuring about 20" long and 16" wide
3. Use a thread color which blends with colors in fabric.
4. You will need a 24" piece of bias tape, twill tape or ribbon for the neck, and one set of round Velcro, (not adhesive Velcro. Velcro will need to be securely sewn).
5. Fold the piece of fabric in half evenly to measure 20" long and 8" wide
6. Line up pattern template on top of fabric with "front " on fold. Mark around and cut out.
7. Place pattern template for "Back" on fabric, mark and cut out two pieces.
8. Zig-zag or serge all raw edges.
9. Start to sew at shoulder, then hem sleeve. Sew sides together, hem bottom and back opening (start sewing from the bottom).
10. Sew bias tape, twill tape, or ribbon to wrong side of neck, then top stitch down on right side.
11. Sew circles of Velcro to close back.
12. Make bow and attach to neck.
13. Cut slit under both arms.
